

Turning Manufacturing Waste into Profit

The Queensland Water and Energy Sustainable Technologies Network (QWESTNet) connects Queensland businesses with sustainable technologies. This forum will help you eliminate waste costs from your business and focus on sustainable manufacturing processes and technologies, with presentations on manufacturing design for less waste, waste reduction and reuse, waste to energy technologies, Cleantech solutions, support programs and local case studies.

Reduce your overheads:

Find out about **waste savings** and new, innovative **technologies**.

Find out how others did it:

Listen to local case studies on tried and tested sustainable solutions that will enable you to make informed decisions.

Build networks to improve your bottom line:

Meet local businesses and professionals who can assist you on your path to success.

Get ahead of competitors:

Visit the trade display tables and find out about today's most innovative, best practice sustainable technologies, cleantech and services.

Who should attend?

- Small to medium sized manufacturing or processing businesses
- Manufacturing professionals: production managers, quality control, engineers, product designers, purchasing managers
- Manufacturing technology and cleantech providers
- Design and packaging consultants
- Any business looking to improve sustainability, save money and gain a competitive edge.
