

Water efficiencies for business

The ecoBiz Network (formerly QWESTNet) connects Queensland businesses with sustainable technology users and retailers. This forum focuses on innovative water and wastewater technologies with presentations on measuring and reducing water consumption, water reuse, water efficiency options, and support programs.

Reduce your overheads:

Find out about water and wastewater savings and other innovative technologies.

Find out how others did it:

Listen to local case studies on tried and tested sustainable solutions that will enable you to make informed decisions.

Build networks to improve your bottom line:

Meet local business and professionals who can assist you on your path to success.

Get ahead of competitors:

Visit the trade display tables and find out about today's most innovative, best practice sustainable technologies, cleantech and services.

Who should attend?

- All businesses that use water
- Aged care facility managers
- Food and industrial manufacturers
- Resort and sporting venue managers
- Laundries
- Restaurants and caterers
- Horticultural industries
- Processing plants
- Schools

Any business looking to improve their sustainability, save money and gain a competitive edge.
