**Subject:** Queensland's Waste Strategy Comments

Hi DERM,

I believe that the Strategy requires more emphasis on waste recovery or waste capture.

I think the Strategy should mention community strategies such as Clean up Australia Day and Tidy Towns.

But I believe that the most important issue is that the State and Councils should look to waste capture through installing gross pollutant traps/litter traps at all stormwater outlets to oceans, rivers or creeks etc.

I believe that the old Stormwater Management Plans that were required under the old EPPWater were meant to managed this issue but were never administered by the EPA at the time.

Warm Regards

Sacha
