

Land manager's monitoring plan

Prepared by _____ Date _____

For property _____

Why do you want to monitor?

How important is it to monitor the outcomes of what you are doing?

How is the monitoring related to your business goals?

How does it fit into your management/business cycle?

What are your monitoring objectives?

What do you hope to gain from you monitoring?

How will your data be used?

Who needs the information (on the property) and will it be shared with others (off property)?

What are the required level of data quality and methods?

What will you monitor?

What indicators will you monitor?

Do you need to meet any regulatory requirements?

Where will you monitor?

When and how often will you monitor?

For how long will you monitor?

Who will be involved and how?

Who will measure, record and analyse your data?
What skills and attributes do potential data collectors have?

How will your data be managed?

How will your monitoring activity be recorded and stored?
How will your data be analysed?
What supporting information is available?

What resources are needed and what do you have available?

What will it cost to monitor?

What is your monitoring budget?

How much time will the monitoring require?
