

Figure 4. Woody vegetation clearing rates in the Northern Gulf Resource Management Group NRM Region by replacement land cover.

Land cover change in the Northern Gulf Resource Management Group Natural Resource Management region

2007-08

Summary

The 2007-08 period saw a return to previously recorded levels of woody vegetation clearing within the Northern Gulf Resource Management Group region, following the peak in 2006-07.

The woody vegetation clearing rate in the Northern Gulf Resource Management Group region for 2007-08 was 2716 hectares per year.

Figure 1. Woody vegetation clearing rates in the Northern Gulf Resource Management Group NRM region.

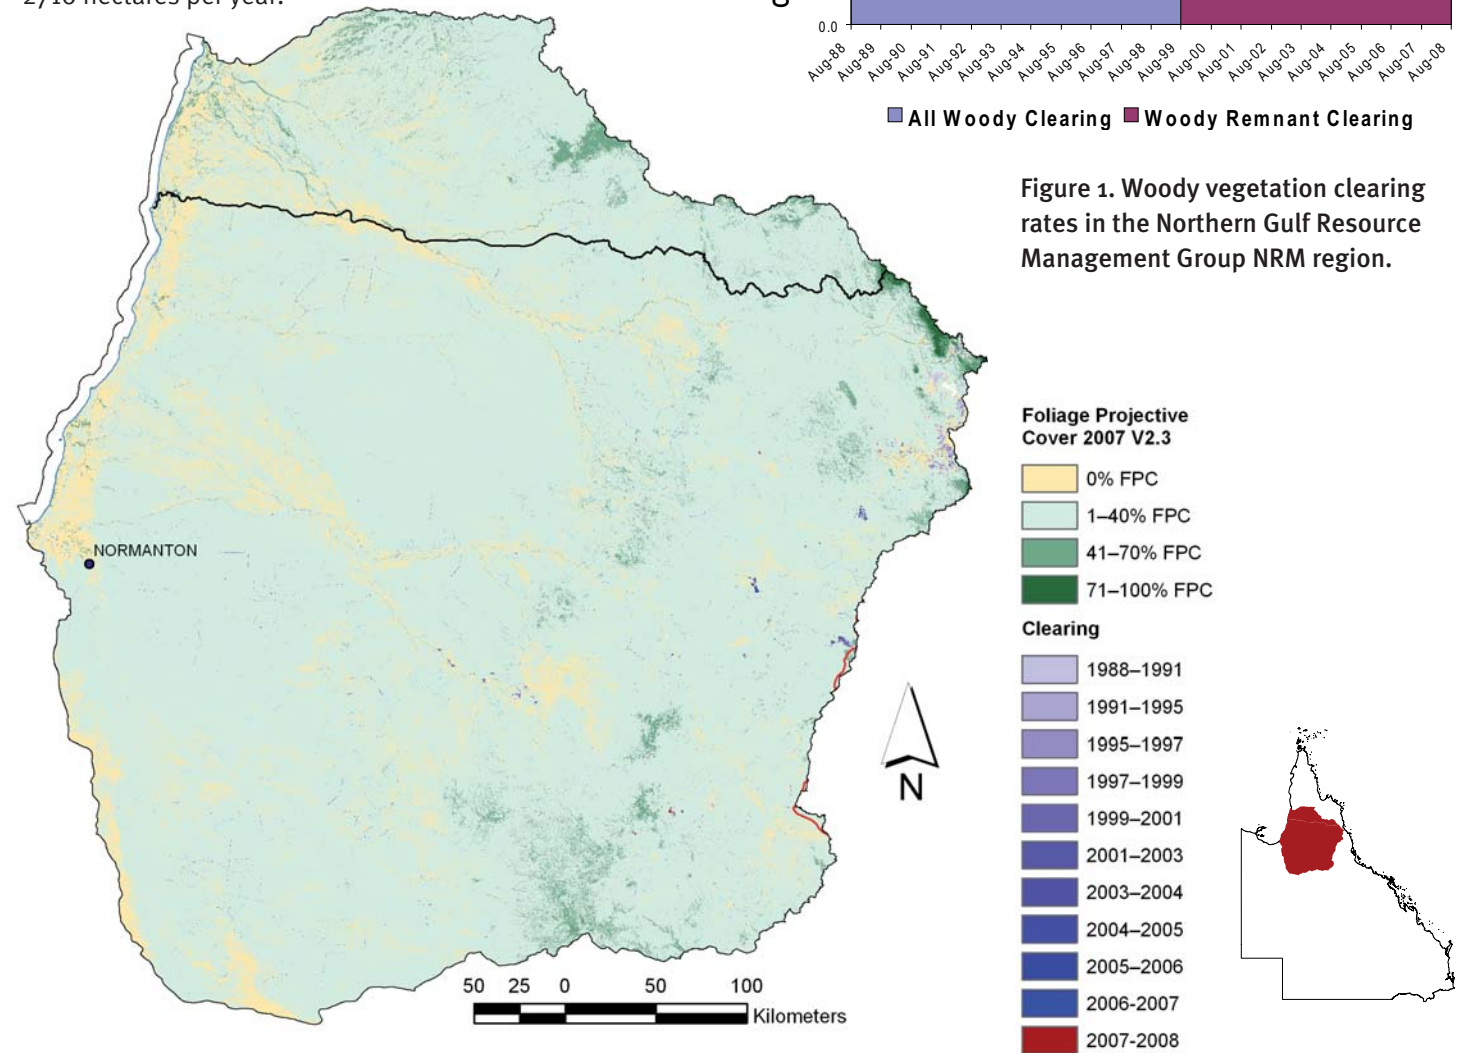

Figure 2. Woody vegetation clearing for each change period.

Note that the Northern Gulf Resource Management Group Natural Resource Management region overlaps the Cape York Natural Resource Management region.

This fact sheet is 6 of 13 in a series detailing land cover change in Queensland's Natural Resource Management regions. These fact sheets are addenda to the report: Department of Environment and Resource Management (2009). *Land cover change in Queensland 2007-08: a Statewide Landcover and Trees Study (SLATS) Report*, Oct. 2009. Department of Environment and Resource Management, Brisbane.

Please refer to this report for further background, methods and explanatory notes.
