

# Property Map of Assessable Vegetation (PMAV) Application Form

s20C *Vegetation Management Act 1999*

Form 20C Version 1.0

**Use this form to apply for a property map of assessable vegetation (PMAV)**

## 1. Application Area

List the lot and plan description of each land parcel subject to this application (e.g. lot 1 on RP12345, lot 2 on RP12345)

.....

.....

.....

## 2. Owners' Consent

If there is more than one owner of the land subject to this application (i.e. the application area as identified in Item 1), each owner must complete and sign this section.

### Read before signing this section

By signing this section, those signing are taken to:

- consent to the lodgement of the application; and
- agree that all the information entered and provided in this application, including any maps, lists or other documents additionally supplied, is correct and accurate; and
- authorise the nominated contact person to act as such on behalf of all signatories; and
- authorise all verbal correspondence relating to this application to be to the nominated contact person; and
- authorise all written correspondence (including the issuing of notices to the owner/s) relating to this application to be sent to the postal address for the nominated contact person; and
- request that the chief executive agree to make a PMAV as proposed in this application.

**NOTE:** if the chief executive cannot make an area a category X area as proposed in this application, notice will be given to the owner/s, via the nominated contact person, outlining the grounds for the proposed decision and inviting the owner/s to make submissions about the proposed decision.

Owner's Name	Owner's Signature	Date	Land parcels owned (e.g. 1 on RP12345, 2 on RP12345)

Attach another page if additional space is required.

<p><b>3. Nominated Contact Person</b></p> <p>The nominated contact person does not need to be an owner of the land subject to this application.</p> <p>All verbal and written correspondence (including the issuing of notices to the owner) will be to the nominated contact person.</p>	<p><b>Name of nominated contact person:</b></p> <p>.....</p> <p>(if a company, please provide a contact person and the company name)</p> <p><b>Company Name &amp; ABN (if applicable):</b>.....</p> <p>.....</p> <p><b>Postal address:</b></p> <p>.....</p> <p><b>Phone number:</b>.....</p> <p>.....</p> <p><b>Mobile number:</b> .....</p> <p>.....</p> <p><b>Fax number:</b> .....</p> <p>.....</p> <p><b>I accept that I will act as the nominated contact person on behalf of the owner(s) referred to in Item 2:</b></p> <p><b>Signature of nominated contact person:</b></p> <p>.....</p> <p><b>Date:</b> .....</p>
<p><b>4. Type of PMAV application</b></p> <p>Specify the type of PMAV you are applying for. You can choose one or more of the following:</p> <ol style="list-style-type: none"> <li>1. Lock-it-in</li> <li>2. Detailed</li> <li>3. Correct map error</li> </ol> <p>Where you choose more than one type of PMAV only one fee will apply.</p> <p>For more information on the different types of PMAV applications please refer to the Landholders Guide to Lodging a PMAV Application available from <a href="http://www.derm.qld.gov.au/vegetation">www.derm.qld.gov.au/vegetation</a></p>	<p><input type="checkbox"/> <b>Option 1: Lock-it-in PMAV:</b> to lock in areas that are non-remnant on both the regional ecosystem map/remnant map and the regrowth vegetation map as category X on a PMAV. Fee required.</p> <p><i>Go to section 5 if you are choosing this option.</i></p> <p><input type="checkbox"/> <b>Option 2: Detailed PMAV:</b> to show some or all of the vegetation category areas (i.e. A, B, C and X) on a PMAV, where they meet legislative requirements and sufficient supporting information is provided. Fee required.</p> <p><i>For example:</i></p> <ul style="list-style-type: none"> <li>• category X for areas that are that are shown as non-remnant on both the regional ecosystem/remnant map and regrowth vegetation map; AND/OR</li> <li>• category B for areas shown on a regional ecosystem map or remnant map as remnant vegetation;</li> <li>• category C for areas shown on the regrowth vegetation map as high value regrowth;</li> <li>• to make changes to mapped vegetation boundaries;</li> <li>• to map the vegetation on your property at a finer, property specific scale (for example 1:25,000 instead of 1:100,000)</li> </ul> <p><i>The vegetation category areas and the scale of the PMAV will be based on the supporting information you provide</i></p> <p><i>For category B and C areas, you may propose to show the boundaries and the regional ecosystem codes for each regional ecosystem in the area.</i></p> <p><i>Go to section 6 if you are choosing this option.</i></p> <p><input type="checkbox"/> <b>Option 3: Correct Map Error:</b> to amend areas mapped as remnant vegetation on the regional ecosystem map/remnant map or high value regrowth vegetation on the regrowth vegetation map where the area on ground clearly does not contain any native woody vegetation.</p> <p>Where they meet legislative requirements, any corrections will be reflected as category X. The PMAV will only show areas subject to a correction. No fee required.</p> <p>If you wish to lock in other areas additional to this correction then choose option 3 along with option 1 or 2.</p> <p><i>Go to section 7 if you are choosing this option.</i></p>

**Only complete section 5 if you selected 'Option 1: Lock-it-in PMAV' at section 4****5. Lock-it-in PMAV - Supporting Information****Required:**

- A current regional ecosystem map or remnant map is attached; **AND**
- A current regrowth vegetation map is attached.

**Optional:**

- A minimum of five (5) points that correspond to identifiable fixed features, with descriptions of the feature represented by each point and the Map Grid of Australia 1994 coordinates and zone references for each point. The coordinates may be acquired by a GPS or similar system of satellites that receives and processes information.

If you supply points, the department can place these on the map to provide extra reference points to locate vegetation boundaries. It is recommended to use obvious property landmarks such as fence corners or dams.

**Only complete section 6 if you selected 'Option 2: Detailed PMAV' at section 4****6. Detailed PMAV - Supporting Information**

You may wish to discuss the supporting information requirements with your local Vegetation Management Officer.

Go to [www.derm.qld.gov.au/vegetation](http://www.derm.qld.gov.au/vegetation) or phone 13 13 04.

**Required:**

1. Provide information that delineates the boundaries of the vegetation category areas (i.e. B, C and/or X) you are proposing to show on the PMAV. Use one of the following options:

- Option 1**—Supply a map showing

- (i) the vegetation category areas and the boundaries of the areas proposed for the PMAV; and
- (ii) a description of the boundaries of the areas by reference to Map Grid of Australia 1994 coordinates and zone references for the areas.

**OR**

- Option 2**—Supply a map showing:

- (i) the vegetation category areas and the boundaries of the areas proposed for the PMAV; **AND**
- (ii) five or more points that correspond to identifiable fixed features; **AND**
- (iii) the Map Grid of Australia 1994 coordinates and zone references for each point, acquired by GPS or similar system of satellites that receives and processes information; **AND**
- (iv) a description of the feature that each point represents.

**OR**

- Option 3**—Provide a dataset, which can be used in a Geographic Information System, showing the vegetation category areas and the boundaries of the areas proposed for the PMAV.

*If you propose to show regional ecosystem codes and boundaries on the PMAV, please also include this information on your map or with your dataset.*

**AND**

2. If redefining the boundaries on the regional ecosystem map attach information to demonstrate that the proposed boundaries are accurate (e.g. valid clearing permit, aerial imagery, Google Earth screenshot, pre-clear regional ecosystem mapping, flora survey and vegetation structure assessment);

**OR**

3. If proposing changes to regional ecosystem categories attach information to demonstrate that the proposed vegetation category areas, and any regional ecosystems to be identified on the proposed PMAV, are consistent with the floristic composition and structure of the same regional ecosystems or vegetation in the area.

Only complete section 7 if you selected 'Option 3: Correct Map Error' at section 4		
<p><b>7. Correct Map Error - Supporting Information</b></p>	<p><b>Required:</b></p> <p>1. Attach a map with:</p> <ul style="list-style-type: none"> <li>(i) the current regional ecosystem or regrowth vegetation mapping (whichever is relevant to your application) on it; AND</li> <li>(ii) the location of the map error clearly identified on it</li> </ul> <p>Please ensure that the map allows accurate depiction of the incorrect area/s.</p> <p><b>AND</b></p> <p>2. Provide information to support the proposed change. For example, aerial imagery or a Google Earth screenshot clearly showing the area in question is incorrectly mapped.</p> <p><b>Optional:</b></p> <p><input type="checkbox"/> A minimum of five (5) points that correspond to identifiable fixed features, with descriptions of the feature represented by each point and the Map Grid of Australia 1994 coordinates and zone references for each point. The coordinates may be acquired by a GPS or similar system of satellites that receives and processes information.</p> <p>If you supply points, the department can place these on the map to provide extra reference points to locate vegetation boundaries. It is recommended to use obvious property landmarks such as fence corners or dams.</p>	
<p><b>8. Information Privacy Statement</b></p>	<p>This information will be used in accordance with the Department of Environment and Resource Management (DERM) <i>Information Privacy Plan</i> which can be found on the department's website: <a href="http://www.derm.qld.gov.au">www.derm.qld.gov.au</a></p>
