

# Notification of works - Part C1 Associated Activities - Alluvium

## Lockyer Valley & Clarence Moreton

(Water Act 2000)

### Use of this Form

Part C1 is required to provide information about each alluvial groundwater activity (e.g. cropping) that is using groundwater taken from alluvial aquifers on the properties identified in Part A.

### Details of Groundwater Activity

#### Question 16

Please provide the property descriptions for the land on which groundwater is being used (i.e. supplied to) for non stock or domestic purposes?

Lot	Plan	Lot	Plan

#### Question 17

If the groundwater was used for crop production, what was the crop type? Please estimate the area of crop for each crop type (in hectares), and the average annual volume of water use for each crop type (in ML/year).  
If more room is required please attach further details.

	Vegatable crops	Lucerne/Pasture	Tree crops	Other (please specify)
Cropping Area (ha)				
Annual Water Use (ML/yr)				

#### Question 18

If the groundwater was used for purposes other than crop production (i.e. intensive livestock, kennel/cattery, mining, etc), please provide details and supporting information of this water use. For example, for intensive stock purposes please provide details of the stock type (i.e. cattle, pigs, poultry), number watered and their annual water requirements (ML/year). This information can be added as an attachment if necessary.

#### Question 19

Is water from any other source of water used for purposes other than stock or domestic? "Other source of water" refers here to water sources that are not groundwater, and could include dams capturing water from overland flow, or water from watercourses.
