

**PART C**

**Supporting Information (Attached)**

The service provider must submit a report containing the supporting information which the regulator needs to make a decision on the exemption application.

The report should:

- Cover the precise exemption being sought and why it isn't practicable for the service provider to comply with the relevant requirements of the **Water Supply (Safety & Reliability) Act 2008**
- Include details of the monetary and non-monetary benefits and costs which granting the exemption would result in, from the perspectives of the following:
  - the service provider;
  - its customers;
  - organisations providing funding support to the service provider and the general community

More details on the information required is contained in the document titled:

*Guidelines for Granting Exemptions for Strategic Asset Management Plans, Customer Service Standards and Annual Reports.*

These guidelines also outline the criteria the regulator will apply when deciding upon exemption application requests.
