This table does not include water allocations associated with the sale of enterprises as a whole e.g. the sale of land and water comprising an irrigation farm

Product means a type of water allocation that constitutes a single trading group.

@ Percentage of total volume of water allocations traded separately to land in the reporting period.

* This figure is a weighted average and is used so that the price is not overly distorted by very large and very small prices per ML. A value of \$0/ML indicates transfers for nil consideration eg. by way of gift.

^ WPBN refers to the Warrego, Paroo, Bulloo and Nebine systems.
